Tarun Makavana

Full Stack Developer

+91-9173704980 tarun0006g@gmail.com linkedin.com/in/tarun-makavana-52601427a github.com/tarun0001g

Summary

Full Stack Developer with a strong inclination toward backend engineering and a genuine curiosity for how systems work under the hood. Grounded in core CS fundamentals - DSA, OOP, DBMS - with a highly adaptable, growth-oriented mindset and a track record of picking up complex problems fast and owning them end-to-end, from system design to deployment.

Skills

Programming Languages : Java, JavaScript, SQL, Python, C
Frontend : React.js, Redux Toolkit, HTML5, CSS3, Tailwind CSS, EJS
Backend : Node.js, Express.js, RESTful APIs, MVC Architecture, JWT Authentication
Database : MySQL, PostgreSQL, Prisma ORM, MongoDB, Mongoose
Tools & AI : Git, GitHub, Thunder Client, Vercel, Render, Cloudinary, Prompt Engineering
Core CS Fundamentals : DSA, OOPs, DBMS, Operating Systems, Computer Networks, Software Engineering

Experience

Full Stack Development Intern **July 2026**
Internship Education *(Remote)*

- Delivered SecureAuthentication, a production-style authentication module, using React, Node.js, Express.js, PostgreSQL, and Prisma ORM.
- Implemented JWT-based auth, bcrypt password hashing, and email verification via the Resend API, following industry practices for API design and secure session management.

Full Stack Developer Intern **June 2025 – July 2025**
Micro Information Technology Services *(Remote)*

- Engineered responsive web interfaces and integrated backend APIs to enhance application functionality and user experience.
- Collaborated on debugging, testing, and improving application performance within a development workflow.

Projects

SecureAuthentication | *React.js, Node.js, Express.js, PostgreSQL, Prisma ORM* **July 2026**

- Engineered a full-stack authentication system from the ground up, implementing JWT-based login, protected routes, bcrypt password hashing, and email verification/reset via the Resend API.
- Modeled a normalized PostgreSQL schema with Prisma ORM and exposed RESTful API endpoints, integrated with a React frontend that manages auth state, access-controlled routing, and real-time form validation feedback.

BookMyStay | *Node.js, Express.js, MongoDB, Mongoose, EJS* **April 2026**

- Developed a full-stack property booking platform following MVC architecture, delivering 7+ user-facing features including secure session-based authentication and role-based authorization.
- Secured 6 admin management capabilities via guarded routes and reusable middleware, including Cloudinary-powered image uploads, complemented by a responsive EJS-rendered UI for browsing and booking.

PasteContent | *React.js, Redux Toolkit, Tailwind CSS* **November 2025**

- Created a React-based paste management application supporting create, edit, delete, search, copy, and share functionality.
- Leveraged Redux Toolkit for state management alongside dynamic routing and localStorage persistence, deployed on Vercel.

Certifications & Achievements

- **Backend Development Certificate** – KnowledgeGate, 2026 (Score: 98%)
- **RDBMS PostgreSQL Training** – IIT Bombay, 2024 (Score: 92.5%)
- **DSA Practice:** Solved 100+ problems in Java on TakeUForward, strengthening algorithmic thinking and problem-solving speed.

Education

B.E. Information Technology **Expected Graduation: 2027**
Shantilal Shah Engineering College, Bhavnagar ***CGPA: 8.43***
